

Audio Applications

C

«Running»
Firefox

○

PID: 126520

○

Status: Active

○

Audio: Streaming

○

Sample Rate: 44100Hz

○

Volume: 100%

C

«Running»
Chromium

○

PID: 3008076

○

Status: Active

○

Audio: Streaming

○

Sample Rate: 48000Hz

○

Volume: 58%

C

«Running»
QJackCtl

○

PID: 3010876

○

Status: RUNNING

○

CPU: 2.8%

○

Memory: 167MB

○

Role: JACK Audio Control

○

Purpose: Additional Routing

Performance Metrics:

- CPU Usage: ~10% total
- Memory Usage: ~500KB total
- Latency: Minimal
- Quality: High
- Stability: Good

QJackCtl Status:

- JACK audio control active
- Additional routing available
- User-initiated for patching
- May interfere with PipeWire
- Use with caution

System Services

C

«Running»
System76_Scheduler

○

PID: 2625

○

Status: RUNNING

○

Role: System Scheduler

○

CPU: 0.0%

○

Memory: 17KB

C

«Stopped»
Volume_Sync_Daemon

○

Status: STOPPED

○

PID File: Exists

○

Daemon: Not Running

○

Issue: Needs Restart

○

Impact: Volume Ratios

Volume Sync Issue:

- Daemon stopped unexpectedly
- PID file exists but no process
- Volume ratios not maintained
- Manual restart required
- Impact: Volume mismatches

Troubleshooting:

- Volume sync daemon stopped
- Restart command needed
- Check for conflicts
- Monitor volume ratios
- Verify daemon logs

Audio Services

C

«Running»
PipeWire

○

PID: 1435575

○

Status: RUNNING

○

CPU: 5.1%

○

Memory: 236KB

○

Role: Audio Server

○

Version: 0.3.x

Audio Stream

Audio Stream

C

«Running»
JamesDSP

○

PID: 3016595

○

Status: RUNNING

○

CPU: Low

○

Memory: Minimal

○

Role: DSP Processing

○

Version: Custom Build

C

«Running»
PipeWire_Pulse

○

PID: 1435578

○

Status: RUNNING

○

CPU: 5.6%

○

Memory: 241KB

○

Role: PulseAudio Compatibility

○

Compatibility: Full

PipeWire Status:

- Primary audio server
- All devices connected
- Stable operation
- Low resource usage
- Full compatibility

Audio Device Status

C

«Warning»
Inactive_Devices

○

Built-in Audio: IDLE

○

Volume Sync: STOPPED

Active_Devices

○

KM Audio: RUNNING

○

Fosi BT30D: RUNNING

○

Thunderbolt Display: RUNNING

○

PCM2912A Codec: RUNNING

○

Tonga HDMI: RUNNING

○

JamesDSP Sink: RUNNING

○

Combined Output: RUNNING

Device Status:

- 7 devices RUNNING
- 1 device IDLE (Built-in)
- All critical devices active
- Audio routing functional
- No device failures

Current Configuration:

- Fosi subwoofer separated
- Dual output chains active
- JamesDSP processing main speakers
- Direct output to subwoofer
- QJackCtl for additional routing
- Volume sync daemon needs restart

Color	Status
#D5E8D4	Running
