New Home Sales (End-User Values)

(These sales indicate modern single-family home values roughly \$200–\$300/sq ft in the area.)

Zoning and Land Use

Both lots lie in Lee County’s **RS-1 (Single-Family Residential)** zoning district (minimum lot 25,000 sq ft). RS-1 permits detached homes; typical land-use designation is “Vacant Residential.” County records show land-use code 00 (“Vacant Residential”) and zoning code RS-1 for similar lots ¹² ¹³. In practice, this means the lots are intended for future single-family homes. Utilities (electricity, water, etc.) are available at the street in this subdivision ¹⁴.

Development Trends and Infrastructure

Recent infrastructure projects are enhancing the area's accessibility and appeal. Notably, Lee County plans to widen **Sunshine Boulevard** to four lanes (from SR-82 to 23rd St SW) to tie into the new Alico Road extension ¹⁵. A \$3.2M project (Bell Blvd) and repaving of 24+ miles of Lehigh roads (\$1.5M) were approved to improve local streets ¹⁶ ¹⁷. Additionally, a funded roundabout at **Gunnery Rd & Buckingham Rd** will improve traffic flow and safety in Lehigh Acres ¹⁸. These projects – along with ongoing residential development – suggest growing demand in the region.

Pricing Analysis and Recommendation

Vacant-land comps indicate per-acre values roughly \$80K–\$120K ⁶ ⁷. Each subject lot is about **0.51 acres**, roughly double a typical quarter-acre comp. If we apply comparable per-acre rates, a 0.51 ac lot might be valued on the order of **\$40,000–\$60,000**. Given the range of nearby sales (\$19K on 0.25 ac up to \$40K on 0.25 ac), a reasonable listing range for each 0.51 ac lot is on the order of **\$35K–\$50K**. This assumes intact access/utilities (as in comps) and similar market conditions. In summary, each lot could be marketed in the mid-five-figure range, subject to final confirmation of lot size and condition.
